CONCLUSION

After deploying your project on Vercel, a successful deployment results in your application being live and accessible via a provided URL. The process involves:

Deployment Verification
Error Checking
Testing
Performance Monitoring
Continuous Updates

RESULT

Successful Deployment
After all these errors:

**Deployment Complete: Vercel will
notify you that your deployment is
successful. You'll receive a URL to
your live application.**

**Preview URL: If you used a preview
deployment, you'll get a unique URL
for that specific version.**

TEST REPORT OF MARKETPLACE

TEST REPORT OF MY MARKETPLACE

TEST ID	TEST CASE DESCRIPTION	TEST STEPS	Expected Result	Actual Result	Status	Severity	Remarks
TC001	Test navigation bar links	Click each link in the navigation bar >Verify page loads	Correct Rendering	All links working correctly	Passed	Medium	Navigation verified
TC002	Test valid login	Enter valid credentials > click Login	User logged in	Not Login successful	Failed	No	Not Verified
TC003	Test product listing	Fetch all products from Sanity API	Products displayed correctly	Verified successfully	Passed	High	No issues found
TC004	Test dynamic product detail	Click on a product > Verify details	Correct product details shown	Details loaded correctly	Medium	Medium	Works as expected
TC005	Test search functionality	Enter query > check results	Relevant results shown	Search working not working	Failed	No	Not Verified
TC006	Test cart functionality	Add/remove items >verify cart updates	Cart updates correctly	Works as expected	Passed	High	Cart Verified
TC007	Test cart functionality	image not showing	Cart not upated	no imgs showing	Failed	No	Not verified
TC008	Test pagination	Navigate through pages of products	Correct products load per page	Pagination works	Passed	High	Pagination Verified
TC009	Test checkout functionality	Go to checkout > Fill details > Place order	Order placed successfully	Checkout process smooth	Passed	High	Checkout Verified
TC010	Fetching Data with query	Execute GROQ query to fetch data from source	Data fetched correctly	Data fetched successfully	Passed	High	Query Verified
TC011	Test sanity output	Run GROQ query to fetch data	Correct data returned	Data matches expectations	Passed	High	Sanity Output Verified
TC012	Test responsiveness	Resize browser >check layout	Layout adjusts correctly	Works as expected	Passed	High	Responsive Verified

PROBLEMS CAUSED
BY DEPLOYMENT

Deployment can introduce various issues that impact the functionality of an application. Here are some common problems and their causes, particularly in setups using headless CMSs like Sanity:

First Problem

Incorrect or missing API configurations during deployment.

Second Problem

Environment variables (e.g., API keys, tokens) not set properly in the production environment.

RESOLVING

ERROR HANDELING

MADE BY FARIA MUSTAQEEM

2

DEPLOYMENT

RESOLVING ISSUES

- Debug with detailed error logs and stack traces.
- Check server and dependency configurations.
- Test fixes locally before redeploying.

ERROR HANDLING

- Use console.log or console.error for tracking errors.
- Surround critical code with try-catch blocks.
- Check and validate user inputs before processing.
- Save error logs in a file for manual review.

DEPLOYMENT

- **Prepare code, dependencies, and configurations.**
- **Test in staging or production-like environments.**
- **Release to production with version control and rollback plans.**
